## Summary

Full Stack Developer from the Philippines with 4+ years of professional experience building scalable web applications across the entire stack. Proficient in frontend technologies including React, Vue, and Next.js, and backend frameworks such as Laravel, Ruby on Rails, Django, and Node.js. Extensive WordPress experience spanning theme development, custom plugins, and full client site builds. Experienced in building reusable UI component libraries, integrating RESTful APIs, and shipping features within cross-functional Agile teams alongside engineers, designers, and product managers. Committed to delivering performant, high-quality interfaces backed by clean, maintainable code.

## Work Experience

### Web Developer | *Project-Based*

TBST Digital Inc.

Feb 2024 – May 2026

- Managed and maintained WordPress websites for multiple clients, handling content updates, bug fixes, plugin maintenance, and performance improvements across various industries.
- Built WordPress sites from the ground up, covering theme development, plugin configuration, and client-specific customizations.
- Developed custom web management systems using Laravel and Vue, delivering admin dashboards and internal tooling tailored to client business needs.

### React Developer | *Full-Time*

Gloster P92 Digital Philippines Inc.

Aug 2025 – Dec 2025

- Assigned to learn Ruby on Rails for backend development and contributed to an internal tool built with RoR.

### Software Developer | *Full-Time*

Full Scale

June 2022 - April 2025

- Delivered frontend and full stack work across multiple client engagements with varied tech stacks: React, Vue, Next.js, Tailwind CSS, and Laravel, adapting to each project's existing architecture and requirements.
- Integrated AI and automation capabilities into client projects using the OpenAI API and n8n, enabling intelligent features and streamlined workflows.
- Contributed to internal tooling projects during inter-client periods, building productivity tools used by the broader engineering team.
- Used bench time proactively to learn new frameworks and languages, continuously expanding technical range across frontend and backend disciplines.

### Full Stack Developer | *Part-Time*

BPOSeats

Sept 2021 - May 2022

- Maintained and enhanced 3 live company software products built with VueJS on the frontend and Django on the backend.
- Developed responsive frontend interfaces and built backend REST API endpoints using Django to support consistent UX across desktop and mobile devices.
- Collaborated closely with the engineering team to deliver reliable full stack updates under production constraints.

### Developer | *Internship*

Abstract Digital Inc.

July 2021 - Aug 2021

- Developed an internal tool using React JS on the frontend and ExpressJS on the backend alongside fellow interns.
- Built reusable React components following the company's design system for UI/UX consistency.

### Developer | *Internship*

MYT SoftDev Solutions

Jan 2021 - Feb 2021

- Contributed to both frontend and backend development on a client project using PHP and the CodeIgniter framework.
- Gained foundational experience in full stack web development workflows and responsive design practices.

## Education

### BS in Computer Science

University of the Philippines - Cebu

2018 - 2022

### Special Project

- Developing Acoustic Models for Cebuano Language
  - Trained acoustic models for automatic speech recognition (ASR) of the Cebuano language using speech corpora sourced from DOST-PCIEERD Project ISIP 6. The work involved processing and aligning audio data, configuring and fine-tuning deep learning models using NVIDIA NeMo, and evaluating model performance on a low-resource, underrepresented Philippine language.

## Skills

### Languages

- JavaScript, TypeScript, HTML5, CSS3, PHP, Python, Ruby, Swift

### Frameworks & Libraries

- WordPress, WooCommerce, Elementor, Divi, Astra, SPINNR, Sage

### Tools & Platforms

- AWS, DigitalOcean, Firebase, Supabase, Vercel, Docker, cPanel, n8n

### Databases

- MySQL, PostgreSQL, SQLite, MariaDB, MongoDB, Redis

### CI/CD & DevOps

- GitHub Actions, Bitbucket Pipelines

### Version Control

- Git, GitHub, Bitbucket, GitLab

### AI Tools

- Claude, GitHub Copilot, ChatGPT, OpenAI API, Gemini
